ONLINE LEAVE MANAGEMENT SYSTEM
RINSIYA RASMIN R V

Introduction:
Online Leave Management System is a web based application that is developed using
PHP and MySQL. The objective of Leave Management System is to develop a web
based application using which management of leave application and approval is done
online. Faculty members of the institute can apply for leave directly from this application.
HOD of their respective department can grant the leave application

Objectives:
The objectives of the web application are:
1. The objective of Leave Management System is to develop a web based application
using which management of leave application and approval is done online.
2. Faculty members of the institute can apply for leave directly from this application.
3. HOD of their respective department can grant the leave application.

Problem Definition:
Manual errors plague administrative task like payroll and leave management with
inaccurate data. The faculty
cannot cancel the leave application once made.

Basic functionalities:
There are three modules of the Leave Management System
- Administrator
